

## DIEBOLD NIXDORF CS 2040 LOBBY CASH DISPENSER SYSTEM

# EASY ACCESS TO CASH

Although the frequency of non-cash payments is growing globally, cash retains its status as the world's number one payment method. Nine out of 10 payment transactions are handled in cash worldwide, and the total volume of global cash withdrawals has risen 8% each year. Knowing this, it is hardly surprising that the number of global ATMs is forecasted to grow continually as consumer demand for convenient cash access remains pronounced.

NIXDORF

### PHILOSOPHY

Our cash dispensers enable you to expand consumer access to cash while providing simple, seamless transaction experiences. The CS 2040 not only makes cash accessible in a small footprint, but it is also designed for fast, easy upgrades to satisfy additional requirements as they emerge. You also have the option to integrate advanced functionality, such as cost-reducing cash recycling or mobile-initiated cash transactions driven by QR codes or NFC technology.

### OPTIMIZE CASH MANAGEMENT

The CS 2040 is a compact, flexible indoor lobby cash dispenser that is also a part of our Cash Cycle Management™ Solutions portfolio, providing convenient cash access while optimizing the cash-replenishment cycle. The CMD-V5 cash media dispenser enables operators to realize closed cash cycles throughout branches thanks to the ability to interchange cassettes between cash-dispensing, cash-recycling and teller automation systems.\* Powered by innovative software and end-to-end cash-management services, the system guarantees audit compliance and maximum transparency of all cash inventories at all times.

### RELIABLE, UPGRADABLE TECHNOLOGY

One of the most important benefits of the CS 2040 is the ability to upgrade to a cash-recycling system when the time is right. This upgradability not only means investment protection, but it also allows you to minimize cash-management costs and maximize system availability. Recycling-capable or not, optimal component accessibility and an intuitive interface make the CS 2040 one of the world's most user-friendly cash-dispensing systems. A broad range of operating information is delivered automatically, enabling proactive and efficient system management, and a robust suite of advanced security solutions keeps assets safe. Combine these factors with dispenser technology that has proven its worth across the globe and cutting-edge cassette technology, and the result is a reliable, flexible system that can be tailored to customers' specific needs.

\* Interchangeable with all Diebold Nixdorf systems that feature CMD-V5 and RM3 modules.

## FEATURES

### APPLICATION

- Lobby front-load or rear-load cash dispenser
- Freestanding, partly integrated, fully integrated, window frame

### MEDIA TECHNOLOGY

#### CMD (Cash Media Dispenser)

- Withdrawals of up to 60 notes in a bundle
- Single or bundle reject/retract
- CCMS ready with E2E cassettes

#### Banknote storage

- 2–4 cassettes
- Maximum fill level: 300 mm
- Fill-level indicator
- Scalable cassette concept: 300 mm (large), 200 mm (small)
- Retract/reject cassette with 2 compartments

### ENHANCED SECURITY

#### Physical

- Consumer awareness mirrors
- Intelligent operator authentication via CryptA Stick
- Anti-card-trapping functionality
- Anti-manipulation card slot

#### Logical

- Encrypting PIN Pad
- Optical Security Guard (OSG)
- Secure channel

## DIMENSIONS

## WHY DIEBOLD NIXDORF?

With an installed base of 1 million customer touchpoints in more than 120 countries, Diebold Nixdorf leads the industry in self-service cash systems automation innovations. This positions us to better understand the market needs of today and anticipate those of tomorrow. Leveraging our IP and expertise in cash handling, security and branch automation, we use our knowledge across peripheral markets where self-service efficiencies are emphasized for consumers who desire ease, familiarity and security with their day-to-day transactions—from branch to mobile and beyond.
