

DIEBOLD NIXDORF CS 562 THROUGH-THE-WALL WALK-UP CASH DISPENSER

A CASH DISPENSING SOLUTION THAT FITS

Cash remains popular despite growth in card-based and digital payments in recent years. With an estimated \$5 trillion in currency circulating the globe, and consumers using cash to conduct 85% of all transactions worldwide, the need for convenient cash access is not going away anytime soon. 54% of surveyed adults in the U.S. use an ATM at least once every three months, and in other developed countries like France, Germany and the U.K., 80% or more of surveyed adults use an ATM at least once a month.

PHILOSOPHY

Consumers' need for convenient cash access is nearly omnipresent, but FIs' ability to place cash dispensers where they want them can be limited by physical constraints. That is where the CS 562 can help. With a wall opening width of only 610 mm and a height of 518 mm, the CS 562 is specially designed to directly replace legacy competitor systems in locations where retrofit options are severely restricted due to heritage building protections or disability compliance concerns.

FIT YOUR SPACE ... AND YOUR NEED

Avoid the need for costly—and sometimes impossible—retrofits by choosing a solution carefully tailored to be a perfect fit for your application. Besides fitting your structure, the CS 562 is designed to fit your self-service banking strategy, serving as a reliable and flexible ATM. Besides dispensing cash, the CS 562 can be equipped with a receipt or A4 statement printer, a 57-key alphanumeric keyboard and barcode reader to facilitate bill payments, balance inquiries, funds transfers and more. With the CS 562, there is no need to feel stuck in the past when it comes to self-service banking.

DESIGNED TO LAST

The CS 562 is designed to last, much like the historic buildings in which it often resides. Our technology delivers high levels of uptime long term thanks to intelligent modules that forecast maintenance needs, four-cassette capacity that reduces the need for cash replenishment, a laser-engraved EPP7 keyboard that resists environmental stresses and more. Whether you seek basic cash-dispensing functionality or additional features that can be deployed when you are ready, the CS 562 is a compelling solution.

WHY DIEBOLD NIXDORF?

With an installed base of one million customer touchpoints in more than 120 countries, Diebold Nixdorf leads the industry in self-service cash systems automation innovations. This positions us to better understand the market needs of today and anticipate those of tomorrow. Leveraging our IP and expertise in cash handling, security and branch automation, we use our knowledge across peripheral markets where self-service efficiencies are emphasized for consumers who desire ease, familiarity and security with their day-to-day transactions—from branch to mobile and beyond.
